CORPORATION

July 15, 1975

Dear Customer:

Attached is the July 1975 Literature Catalog. Please read all instructions in the front section of this catalog before placing orders. This catalog obsoletes all previous editions.

Tranex Users Guide, Publication No. 60436500 will not be available under Kronos V2.1. This document will be available under NOS V1.0, but not until 11-15-75.

Batch Users Guide, Publication No. 60436300 will not be available until 10-22-75.

T-S Users Guide, Publication No. 60436400 will not be available until 9-15-75.

G. F. Moore, Manager
Literature & Distribution Services

INTRODUCTION

The Literature and Distribution Services Department of Control Data Corporation is responsible for the publishing of this catalog and the distribution of the items contained therein. The purpose of LDS is to provide a central ordering and distribution service for the external sale of literature and coding forms to Control Data customers.

The Customer Catalog will be published twice during 1975, with literature supplements published during the interim months. The monthly supplements reflect the changes which have taken place in the previous month including obsoleted publications, new publications and revision changes.

LDS solicits your comments and requests that verbal or written communication be directed to the Manager of Literature and Distribution Services.

MANUAL DEFINITION

The following general description of manuals, operator guides and handbooks is provided to allow the catalog user to more quickly identify categorically, the type of book he requires. With this information the user can then relate more easily to the section of this catalog which contains the required manual.

Hardware Reference Manual - This manual provides functional and operational descriptions and general programming capability information on Control Data hardware products and systems. This manual is written to the level of a knowledgeable prospective customer, professional programmer, and equipment operator.

Customer Engineering Manual - This manual provides the technical information necessary to maintain Control Data hardware products. Categories of information presented, in one or more volumes, are: General Description, Operation and Programming, Installation and Checkout, Theory of Operation, Diagrams, Maintenance, Maintenance Aids, Parts Data, Wire Lists, and Equation Summary {or equivalent}.

Hardware Reference/Customer Engineering Manual - This combined manual, usually for less complex devices that require minimal programming information, contains the same information as that in separate Reference and Customer Engineering manuals.

Site Preparation Manual - This manual presents technical information with which to plan and prepare sites for computer installation. Three sections make up this manual:

> Section I: General Information - Two Section I manuals are available: One for small systems; the other covers large and medium-scale systems.
>
> Section II: System Information - Section II manuals cover site planning information for specific systems; e.g., 3300, 6400, etc.
>
> Section III: Peripheral Equipment - Section III provides site planning data on all Control Data peripheral equipment.

Hardware Diagnostic Reference Manual - This manual provides a functional description and detailed operating instructions for diagnostic programs.

System Operator's Manual - This manual provides operating instructions to the system operator. Instructions in this manual normally include system start-up, message formats, error recovery procedures, and general system information. This manual is written to the level of computer operators who do not have a detailed knowledge of programming.

System Reference Manual - This manual describes the system in terms of function, applications, and capabilities. Provides a configuration of the hardware that makes up the system with a brief description of the system function of each product. May also include a description of the software available with the system. Written to the level of the prospective customer who does not have a detailed knowledge of either the hardware or software.

Software General Information Manual - This manual provides introductory descriptions of functional and operat'onal characteristics of Control Data software products.

Software Reference Manual - This manual provides complete descriptions of external functional and operational characteristics of Control Data software products.

Software Operator's Guide - This manual provides detailed instructions for operating Control Data software systems.

Software Diagnostic Handbook - This manual provides the messages issued by all programs in a software product set, together with the recommended action.

Software Installation Handbook - This manual provides installation and modification instructions for Control Data software products.

Software User's Guide - This manual provides the layman with the instructions on how to use a software product.

Software Instant Manual - This pocket-size manual provides summary information {deck structures, etc.} for system programmers and operators of software systems.

LITERATURE ORDERING POLICY AND PROCEDURES

Please read these policies and procedures prior to ordering to avoid confusion and mistakes and also to expedite the handling of orders.

PURCHASE ORDERS - Orders directed to LDS should include, if possible, a numbered purchase order, a money order or personal check.

ORDER LEAD TIME - All customer orders received will be handled on a priority basis and normally processed within a four working day period. Please keep in mind the transit time required by your order to both get to LDS and for the order to travel to your place of business. Under normal conditions, complete turn around on orders should not exceed fourteen calendar days.

DOMESTIC ORDERS - All purchase orders from domestic customers should be forwarded directly to:

Literature & Distribution Services
Control Data Corporation HQC00C
8100 34th Avenue South, P.O. Box 0
Minneapolis, Minnesota 55440

INTERNATIONAL ORDERS - International customer orders should be directed to the nearest Control Data Sales Office. The Control Data Sales Office will then process your order through LDS.

PRICING - The prices contained in this catalog are subject to change without notice.

FOB - All prices are F.O.B. Minneapolis, Minnesota

TERMS: NET 30 DAYS

SHIPPING REQUIREMENTS - Shipping instructions as given by the customer will be followed whenever possible. However, when the instructions cannot be adhered to, LDS reserves the right to determine the mode of transportation.

PRICE QUOTES - Price quotes are available upon request and are valid for 30 days only.

TELEPHONE ORDERS - LDS will accept telephone orders but each order must reference a purchase order number. A purchase order must follow confirming the phone order, and should be marked ''confirmation, do not duplicate''.

IDENTIFICATION OF MANUALS NEEDED - When ordering, you must specify whether you require a specific revision packet to a manual or if you desire the complete manual with all applicable revision packets updating the publication to its current revision level.

NOTE: In some cases, the revision packet required is not available. However, the manual itself may have been reprinted through the revision which you require. If the packet is not available and you wish LDS to send you the updated manual, please specify same on your order. If you do not give LDS specific instructions for such a possibility, LDS will return your order and will not arbitrarily send the updated manual in place of the unavailable revision packet.

BACK ORDERS - All out of stock items will be automatically backordered and routed to you upon resupply of the item to stock. Please contact LDS should you not want specific items backordered.

DISCOUNTS - Discounts are given for literature as follows:

{1} A 10% discount is given when ordering 25 to 99 copies of a single document.

{2} A 20% discount is given when ordering 100 or more copies of a single document.

RETURNS FOR CREDIT - LDS does not sell literature on a consignment basis but will accept returns to stock if LDS has misfilled or delayed delivery of order so that the manuals are no longer required. Manuals which customers have ordered in excess of their needs may be returned if the publications are still current. IT IS IMPORTANT THAT YOU CONTACT AND RECEIVE FROM LDS WRITTEN APPROVAL BEFORE ANY MANUALS ARE RETURNED TO LDS. The manuals must be unused, in new condition and sent freight prepaid. Complete paperwork must accompany all returns for credit. Complete paperwork would include your original order number and if possible a copy of the order, the date of order and a copy of the LDS generated order invoice. All uncleared return to stock orders which LDS receives will be returned to the originator at the originator's expense.

AUTOMATIC SOFTWARE REVISION PACKET DISTRIBUTION SERVICE - On July 1, 1972, an additional service was made available to CDC customers. This service provides for the free postpaid automatic distribution to eligible customers of software revision packets as the packets become available. The policy holds that all external customer manual orders received directly from the customer by LDS on July 1, 1972 and thereafter will be eligible for automatic revision packet distribution. The customer is requested to return a copy of the shipping document which will be provided by Literature and Distribution and indicate on the document which Software publications they wish to have placed on the A/D service. A cover memo will be sent with each shipment indicating the guidelines you must follow. The packets will then be supplied to the customer in the same quantity as the manuals purchased under the original manual purchase order. The packets will continue to be distributed as long as packets are published or until the customer notifies LDS that the distribution should stop. You must establish eligibility

by the purchase of a manual as a customer will not be placed on the listing if he purchases only a revision packet. Revision packets for manuals purchased prior to July 1, 1972, must be purchased by the customer and not through a CDC Sales Office. Not all customers will want this service as some manuals are purchased for a short duration use, such as orders by educational institutions for class use. Please indicate on your order if you do not wish this automatic packet distribution service.

GENERAL REVISION PACKET PRICING - All revision packets which support manuals sold to external CDC customers by LDS after July 1, 1972, will be provided free of charge. The packets will be given in the same quantity as the original manual purchase. Software packets will be automatically distributed {see Automatic Software Revision Packet Distribution above} whereas, requests for Hardware and Miscellaneous packets to support previously purchased manuals must be made directly to LDS by the customer. Please state on your order that the packets are in support of previously ordered manuals to avoid a billing for the packets. Quantities of packets which are in excess of the total number of manuals initially purchased by the customer will be charged to the customer.

PROCEDURES FOR ORDERING CODING FORMS

All purchase orders for coding forms from International customers should be directed to the nearest Control Data Sales Office. All purchase orders from Domestic customers should be directed to:

Literature & Distribution Services
Control Data Corporation
8100 34th Avenue South, P.O. Box O
Minneapolis, Minnesota 55440

The unit price, form number, description and sheets per pad are as shown on the following pages.

Control Data does not offer quantity discounts on Forms sales.

ACCUMULATED LITERATURE CHANGE LISTING

This section is an accumulation of all literature revisions, additions and deletions which have taken place since the issuance of the January 1975, Literature Catalog. The manuals are listed numerically by product number.

The legend for columns one through six is as follows:

1-New or revised literature published since last edition.
  A. N-New Publication
  B. R-Revision in packet form only
  C. RM-Revision in manual form only
  D. RMP-Revised manual/packet available
  E. RO-Revised publication obsoletes all previous editions.
2-Publication number of literature
3-The latest revision level
4-Indicates size of hard cover binder that may be used for manuals
5-Publication division responsible for contents of literature

SECTION 1

This section contains Hardware Manuals for individual equipments arranged in equipment designator sequence. Product numbers are included in parenthesis after the equipment designator. Additional manuals may be found in Section 2 by looking up the Product Number.

SECTION 2

The manuals in this section are listed by Product or System Number. Many entries include a product to equipment cross reference: e.g. 1742 {CL309-A/B, FF511-A/B}. Since Hardware Manuals for equipment developed after November, 1967 are categorized by equipment designator, always look up the equipment designator in Section 1 as well as the Product Number.

SECTION 3

PLEASE NOTE:

A number of Software Manuals are listed in more than one location because of the fact that specific software products will run on various operating systems.

Manuals in this section

The format in this section uses a machine line heading with a listing of manuals for each operating system version and the appropriate product set members printed beneath the heading.

TABLE OF ABBREVIATIONS

All Titles for software manuals have been reviewed and standardized. The following table lists all abbreviations and their full wording.

ADB	Applications Development Bulletin
BIN	Binary
BSIPP	Simultaneous Peripheral Processor
COMPAT	Compatible
COMPARATIVE	Used with FORTRAN, notes the similarities and differences among the FORTRAN for 3000 and 6000 machine lines and USASI
EXT	Extended
FTN	FORTRAN
FUNCT	Functions
GENERIC	Algol, applicable to all 3/6 machine line
HS	High Speed
IHB	Installation Handbook
LIB	Library
META	Procedure Oriented Source Language Assembler
MP	Memory Protect
MS	Mass Storage
MSIO	Logical Input/Output On Mass Storage
REF	Reference
OP	Operating System
REGINA 1	Linear Programming Package
RESPOND	Multiaccess Subsystem For Remote And/Or Local Ter
SAINT	1401 Simulator And Interpreter
SASY	31/32 Satellite For Standard File Processing-3600
SDPS	Seismic Data Processing System
SFP	Standard File Processor
SIPP	Simultaneous Peripheral Processor, Batch Execution
SMT	Summit
TSORT	Tape Sort
XLAT	Translator
